Intended Use:

The G-Button is a **replacement feeding tube** for long-term enteral administration of nutrients and medication directly into the stomach and may not be inserted into the existing and healed stoma for at least 6 weeks after a PEG is inserted. Furthermore, the G-Button is indicated for patients with a low risk of aspiration and/or require **gastric decompression**

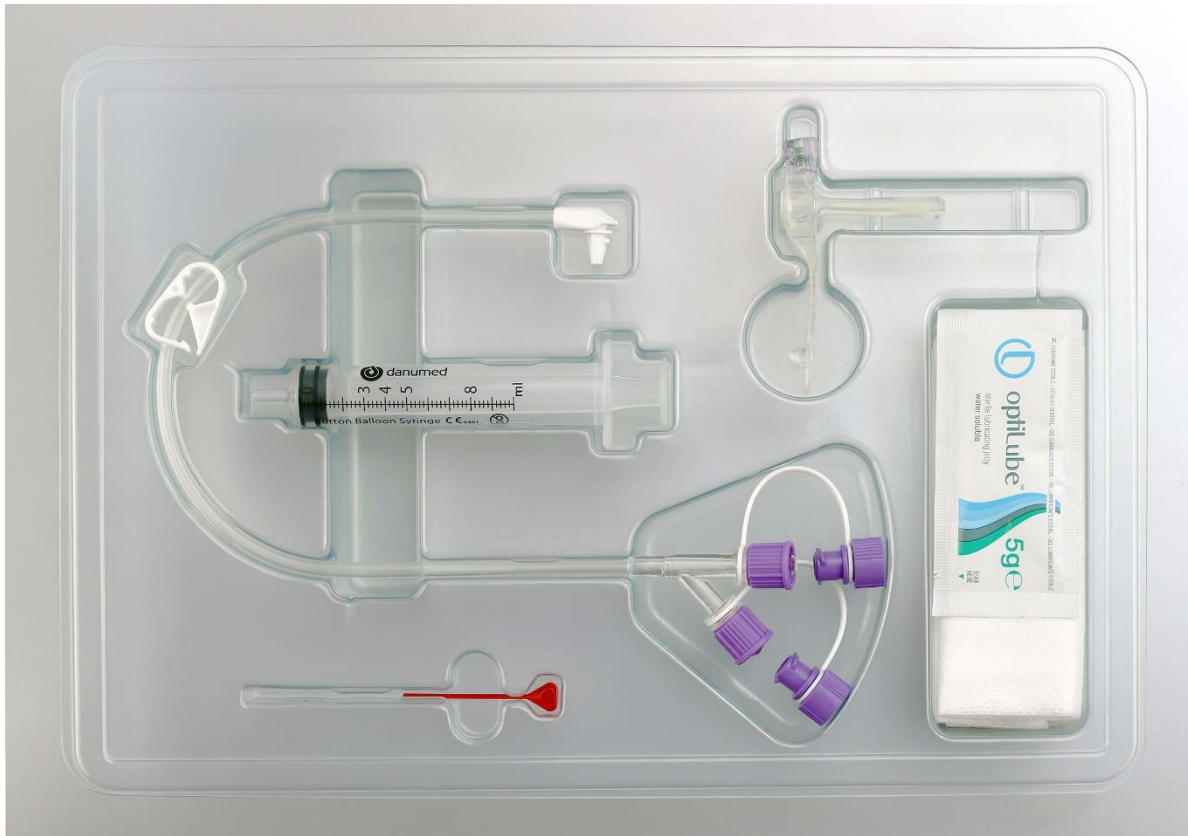

Using Recommendations:

Available sizes from Fr 12 to 24 and lengths from 8mm to 50mm to best fit the patient's stoma size

- Balloon volume indicated on the inflation valve
- Radiopaque stripe along the shaft
- Recessed tip to avoid trauma
- Flat, rounded tip to avoid trauma
- High comfort due to flexible silicone
